## New Hybrid Model

With COVID 19 completely changing the dynamics of the business ecosystem, re-invention has become a new normal. The boundaries between online and offline blurs as traditional businesses go remote, and digital natives expand their domination. As things slow down temporarily, we have the opportunity to upgrade and rethink the way we operate. The time is now.

At Globoil we're optimists. We have always done events on the assumption that everything will get better, we can benefit the industry and that we can have a positive influence on the world. Sometimes that optimism is tested. This is one of those moments, but it's also a chance to take a step back and look at how we can forge ahead.

The way we see it, there's a silver lining to this: We are introducing a hybrid model where Globoil India 2020 will be a blend of physical & virtual event. We want to make our flagship event even bigger and better than before. We believe we can make that happen.

In addition to the physical conference, we will also have thousands of participants from around the world attending the conference and networking in a virtual platform created by us. These are just additional benefits to be fair.
